Abhishek Kumar

Python Developer | Data Scraping & Automation

+91 9074202062 | abhishekkumar269@gmail.com | LinkedIn | GitHub

PROFILE

Python Developer specializing in web scraping, data extraction, and browser automation. Built 20+ scrapers from real Upwork job requirements and practiced on 50+ websites. Experienced with dynamic pages, multi-tab automation, duplicate cleaning, and exporting clean CSV/JSON datasets.

SKILLS

Languages	Python, SQL
Scraping & Automation	Selenium, BeautifulSoup4, Requests
Data	Pandas, NumPy, CSV / JSON
Cloud & Tools	AWS (EC2), Git / GitHub, AI Tools (ChatGPT, Claude)
Web	HTML, CSS, Bootstrap, Django

EXPERIENCE

Data Scraping & Automation Developer Feb 2025 – Present

Independent · Remote

- Built scrapers from real Upwork job posts across e-commerce, US federal courts, healthcare, fitness, podcasts, and school sports data
- Built a multi-tab flow in Selenium: main page stays open while its child pages open headless, save data, and close
- Removed duplicates, merged list-page and detail-page data, and handled missing fields with exceptions so runs continued past bad records
- Handled pages whose JavaScript changed on every load and accessed a geo-restricted site through a VPN
- Built a reusable boilerplate (Selenium setup, CSV export, deduplication, multi-tab handling) to start new scrapers quickly

Independent Equity Trader Jan 2021 – Jan 2025

Self-Employed · Indian Stock Markets

- Full-time retail trader in Indian equity markets with a focus on technical analysis and price action
- Developed Python and Django skills alongside trading, the foundation for my current scraping work

Full Stack Developer Feb 2019 – Jan 2020

Cybetiq Pvt. Ltd. · Noida, UP

- Designed and developed websites with a focus on front-end design and UI
- Worked with HTML, CSS, JavaScript, Bootstrap, and PHP in a team environment

PROJECTS

Web Scraping Portfolio — 50+ Sites github.com/suspaaX/web-scraping-portfolio

- Practice scrapers for e-commerce, finance, sports, and entertainment sites such as Amazon, Flipkart, NSE, IMDb, and Cricbuzz
- Built with Selenium, BeautifulSoup4, and Pandas; output as structured CSV/JSON

Upwork Job Scrapers — 20+ Builds github.com/suspaaX/client_scraping_project

- Scrapers built from real Upwork job requirements, with dynamic scraping, pagination handling, and clean dataset output
- Used Pandas and NumPy to clean and format data before CSV export

CODING PRACTICE

LeetCode Profile leetcode.com/u/creativemathur

- Solved 100+ LeetCode problems and earned the LeetCode 50 Days Badge 2026
- Currently learning data structures and algorithms, focusing on optimal solutions

EDUCATION

B.E. Computer Science & Engineering 2011 – 2016 | 71.50%

Laxmipati Institute of Science & Technology, Bhopal

ACHIEVEMENTS

- Awarded Best Debut Performer at Trifid Research Pvt. Ltd.
- Presented a paper on "Cyber Law Management for IT Professionals" at National Seminar, LIST Bhopal; Team Leader for final year project
